

Product Experience

Product, TikTok

Feb 2024 – Present

Global PM for TikTok Shop's seller-funded promotion tools, driving revenue growth through discounts, flash deals, and coupons.

- Delivered a series of feature enhancements for "Free Shipping" promotions, boosting seller adoption from 6% to 10%, and increasing order penetration from 12% to 19%, driving a +4.7% increase in customer conversion rate.
- Enabled split-fulfillment for "Gift With Purchase" promotions, increasing seller adoption by ~100%, resulting in a +\$1.4MM increase in weekly revenue.
- Implemented performance-based seller criteria to improve marketplace promotion quality and customer trust, driving a 4% reduction in product views with substandard promotions while maintaining revenue targets.

Senior Product Manager Technical, Amazon

Amazon Web Services – Retail Applications

Aug 2022 – Feb 2024

Product founder for a new AWS service streamlining omnichannel commerce software for large enterprise retailers.

- Secured multi-million dollar funding for new business unit via comprehensive PR/FAQ proposal combining product strategy, user research, market analysis, financial modeling, and GTM planning.
- Defined MVP product requirements, onboarded 20+ engineers to spearhead development, and acquired 3 retailers and 6 independent vendor partners for private beta, preparing product's future enterprise-scale adoption.

Physical Stores – Promotions

Dec 2020 – Aug 2022

First product leader for promotions CX & technology across Amazon's physical stores, including Fresh, Go, & Books.

- Developed "Coupon Wallet", which enabled in-store redemption of digital coupons across point-of-sale, smart carts, and Just-Walk-Out™ shopping, increasing weekly sales by +10% while reducing promotion shrink by -8%.
- Launched post-purchase incentive system driving +21pp increase in repeat customer rate and streamlining promotional OPEX across seasonal peaks through automated offer management.

Supply Chain Optimization Technologies – Topline Forecasting

Jun 2017 – Dec 2020

Developed forecasting software to predict category-level revenue, shipments, and customer counts for each day in the next 5 years, informing company-wide strategic planning, long-term operations investment, and earnings guidance

- Built automated forecasting platform, reducing forecast refresh SLA from 3+ days to 20 minutes, enabling on-demand revenue predictions and saving 500+ person-hours quarterly across global finance teams.

Product Manager, DigitalOcean

Jul 2015 – Aug 2016

Owned Billing and Customer Support products, including customer-facing interfaces, metering and invoicing services, and internal support tools.

- Built trust & safety tool to triage 40,000+ monthly abuse incidents, improving resolution rates and agent efficiency.
- Redesigned support interface prioritizing self-service pathways, reducing ticket volume while maintaining CSAT.

Product Manager, Knote.com

Apr 2014 – Jun 2015

Led customer acquisition and onboarding, driving adoption and retention through behavior-based campaigns.
